

JOURNAL OF PHYSICS C
PROCEEDINGS OF THE PHYSICAL SOCIETY
1968—SER. 2, VOL. 1
SUBJECT INDEX

	PAGE
Absorption intensities, optical, and quantum counter action of Er^{3+} in yttrium gallium garnet	157
Absorption, optical, <i>see</i> Optical absorption	
Absorption, phonon, <i>see</i> Phonon absorption	
Absorption spectra, <i>see</i> Spectra, absorption	
Absorption spectra x-ray, <i>see</i> X-ray absorption spectra	
Acceptor centre in natural semiconducting diamond, nature of (L)	1774
Acoustic behaviour of critical mixture of methyl alcohol and cyclohexane	1476
Acoustic impedance of liquid ^3He	555
Acoustic paramagnetic resonance spectrum of chromous ions in magnesium oxide	594
Adsorption, gaseous, influence on metal-BaTiO ₃ contact	1370
Alkali halides, experiments relating to effect of impurities on F-centre production in	323
Alkali halides, phase transitions of, Born treatment, using new van der Waals coefficients (L)	1134
Alkali halides, relaxation phenomena due to interstitial impurities in	644
Alkaline earth chalcogenides, ionic radii in	582
Alkali-liquid sodium alloys, nuclear magnetic resonance in	1097
Alloy films, superconducting, magnetic properties of	699
Alloy, Heusler, Co ₂ MnSn, Mössbauer effect in	473
Alloys, Al-Zn dilute, nuclear magnetic resonance, quadrupole structure in	1690
Alloys, copper-based, electronic specific heats of	795
Alloys, dilute magnetic, spin polarization in	1706
Alloys, dilute transition metal, magnetic moments in	687
Alloys, ferromagnetic, second-order effects in diffuse elastic neutron scattering	966
Alloys, Fe-Pd dilute, spin-wave stiffness of	1699
Alloys, Gd-Y, spin-disorder resistivity measurements in (L)	1140
Alloys, iron-rich, with various transition elements, magnetization values for	244
Alloys, liquid sodium-alkali, nuclear magnetic resonance in	1097
Alloys, Mn-Pd and Mn-Ni γ -phase, antiferromagnetism in	1683
Alloys of nickel, electrical resistivity	1359
Alloys, solid solution iron-rich, with non-transition elements, saturation magnetizations of	1103
Alloys, transition metal, electronic structure of	253
Alum lattice, relaxation behaviour of Cr^{3+} ions in	149
Alumina, ferrous ion ground state and spin-lattice relaxation of	1554
Aluminium and titanium acetylacetonate crystals, spin-lattice relaxation of	1543
Aluminium fluoride, electron paramagnetic resonance spectrum of Cr^{3+} ions in single crystals of	387
Aluminium, high-temperature thermodynamic data, measurement and analysis of	1481, 1489
Aluminium oxide, heat capacity of	1481
Aluminium, reflected low-energy electrons, characteristic energy losses	979
Aluminium x-ray band spectra, interpretation of	767, 776
Aluminium-zinc, dilute alloys, nuclear magnetic resonance, quadrupole structure in	1690
Ammonium chloride, electronic contribution to linear electro-optic effect in	286
Annealing and re-irradiation behaviour, F band in LiF	906
Antiferromagnet, ground-state sublattice magnetization in	408
Antiferromagnet, Heisenberg, spin-wave theory of impurity states in, impurity-host exchange coupling	102, 118
Antiferromagnetic crystals, magnon sideband shapes, Green function theory of	1568
Antiferromagnetic order in gadolinium aluminate	165
Antiferromagnetic rare-earth ortho-aluminates, three, some thermal properties of (L)	539
Antiferromagnetic resonance measurement in $\alpha\text{-Fe}_2\text{O}_3$	169
Antiferromagnets, two-magnon scattering of neutrons involving orbital transitions in	673
Argon, fluid, direct correlation function and equation of state of	271
Arsenic, chemical effects in x-ray K absorption spectra of	208

	PAGE
Atomic displacement energies for binary semiconductors	1734
Atomic displacements, and band edge radiative emission in CdTe	1737
Atoms embedded in electron gas, statistical model calculations of	53
Band edge radiative emission and atomic displacements in CdTe	1737
Band structure of Cu metal, cellular eigenvalue calculations	1633
Band structure, electronic, muffin-tin approximation in calculation of	1288
Band structures, electronic, in Cu and Fe, approximate calculation of	1637
Bands, hybrid, model for electron correlations in	1263
Barium fluoride, Grüneisen parameter low-temperature limit, on Axe's shell model (L)	1138
Barium titanate-metal contact, gaseous adsorption influence on	1370
Beryllium fluoride, vibrational spectra of	299
Bismuth, liquid, structure factors of	1075
Cadmium sulphide, electron spin resonance in	1213
Cadmium sulphide phosphors, infra-red luminescence and role of cation vacancies	1746
Cadmium telluride, atomic displacements and band edge radiative emission in	1737
Cadmium telluride, evidence for enhancement of polaron effect in magnetophonon resistance oscillations in	821
Cadmium telluride, n-type, oscillatory photoconductivity from shallow donors	1412
Caesium antimonide, magnetic properties deduced from neutron scattering data for	679
Caesium arsenide, magnetic properties deduced from neutron scattering data for	679
Caesium bromide, low-temperature specific heats and thermodynamic properties of	1162
Calcium fluoride, Grüneisen parameter low-temperature limit, one Axe's shell model (L)	1138
Calcium fluoride with Tm^{2+} and Yb^{3+} covalency in	1670
Calorimeter, adiabatic, for temperature range 25–500 °C	1481
Cation vacancies in zinc and cadmium sulphide phosphors, role in infra-red luminescence	1746
Cellular method for band structures, calculation for Cu metal	1633
Centres, F-aggregate, in KBr crystals, optical and thermal stability, half-widths and oscillator strengths	895
Chalcogenides, alkaline earth, ionic radii in	582
Chromium, triply ionized, in alum lattice	149
Chromium, triply ionized, in single crystals of AlF_3 , electron paramagnetic resonance spectrum of	387
Chromium ions in magnesium oxide, acoustic paramagnetic resonance spectrum of	594
Cobalt oxide, semiconducting, optical absorption of small polarons in infra-red	1418
Cobalt MnSn, Mössbauer effect in	473
Cohesive energy in simple metals, structural expansion of	1620
Colour centres, trigonal, in MgO, spin-orbit coupling and stress spectra of	1194
Coloured KCl cadmium-doped crystals, optical absorption, electron spin resonance and electrical conductivity	1220
Conductivity, electrical, <i>see</i> Electrical conductivity	
Conductivity, thermal, <i>see</i> Thermal conductivity	
Contact, metal with BaTiO_3 , gaseous adsorption influence on	1370
Coordinates, collective, for trigonally distorted tetrahedron	872
Copper-based alloys, electronic specific heats of	795
Copper, electronic band structures, approximate calculation of	1637
Copper 2+ ions, electron paramagnetic resonance spectrum in tetrahedral crystal fields, electric field effect	877
Copper 2+ ions in tetrahedral co-ordination, molecular orbital theory for	810
Copper 2+ ions in ZnO lattice, crystal field changes due to ligand ion displacements	872
Copper metal, band structure of, cellular eigenvalue calculations	1633
Copper, reflected low-energy electrons, characteristic energy losses	979
Copper wire, thin, resistivity change due to pulsed electric field	1318
Copper wire, thin, some effects due to pulse of high current density in (L)	827
Copper, x-ray K-absorption edge, shifts due to chemical effects	1658
Covalency in Tm^{2+} and Yb^{3+} in calcium fluoride	1670
Crystal-field effects, temperature-dependent, in spin-wave spectrum of terbium	132
Crystal-field parameters, isotope effects in (L)	1768

	PAGE
Crystal fields, tetrahedral, electric field effect on electron paramagnetic resonance spectrum of Cu^{2+} ions	877
Crystallization and magnetic ordering in electron gas	61
Crystals, antiferromagnetic, magnon sideband shapes, Green function theory of	1568
Crystals, cubic, Debye characteristic temperature for (L)	1456
Crystals, cubic, Zeeman spectra of ions in, intensities for $\Gamma_6 \rightarrow \Gamma_8$ and $\Gamma_7 \rightarrow \Gamma_8$ transitions (L)	1455
Crystals, cubic, zero-point vibrational energy	839
Crystals, electrostatics of, generalized form of Ewald method for point charges	1534
Crystals, finite ionic, optical lattice vibrations in	614, 630, 1515
Crystals, high-temperature thermodynamic properties, anharmonic effects, analysis of	1489
Crystals, KBr, F-aggregate bands, optical and thermal stability, half-width and oscillator strengths	895
Crystals, perfect, nuclear resonant diffraction of gamma rays by	973
Crystals, α -quartz, refractivity due to electric field	889
Crystals, optical absorption in, second-order electric moment contribution	1176
Crystals, rare-gas, defect-induced one-phonon absorption in	1184
Current density, high, some effects in thin copper wire due to pulse of (L)	827
Current density nonlinear second harmonic generation in inhomogeneous semiconductors, at low temperature	1128
Current, steady, in strong electric fields	49
Cyclohexane and methyl alcohol critical mixture, acoustic behaviour of	1476
Debye characteristic temperature for cubic crystals (L)	1456
Defect clusters, very small, study in irradiated magnesium oxide, using long-wavelength neutron scattering measurements	333
Defects and impurities in solids, strict bounds for out-of-band frequencies due to	22
Defects in Ising lattices	575
Defects, planar, influence on superconducting surface nucleation fields	293
Deuterium bromide, nuclear magnetic spin relaxation in solid solutions of hydrogen bromide in	422
Deuterium chloride, nuclear magnetic spin relaxation in solid solutions of hydrogen chloride in	445
Diamond, infra-red electro-optical effects in (L)	1769
Diamond, natural semiconducting, acceptor centre, nature of (L)	1774
Diffraction of low-energy electrons by crystals	82
Diffraction, low-energy electron, from crystal surfaces	1237
Diffraction, nuclear resonant, of gamma rays, by perfect crystals	973
Diffraction techniques, neutron, application to determination of structure factor for liquid metals	784
Diffraction, x-ray, and Mössbauer study on cation distribution in FeAl_2O_2	469
Diffraction, x-ray, line profiles, effect of substitutional disorder in spinel structure upon	658
Diffraction, x-ray study of disorder in MgFe_2O_4 and $\text{Mg}(\text{Cr}, \text{Al})\text{O}_4$	663
Dipole-dipole forces in Heisenberg model, free energy dependence on sample shape	1584
Disorder, in MgFe_2O_4 and $\text{Mg}(\text{Cr}, \text{Al})\text{O}_4$, x-ray diffraction study of	663
Disorder, substitutional, in spinel structure, effect upon x-ray diffraction line profiles	658
Disordered materials, localization of classical electrons in, study by percolation theory	1532
Di(tetramethylammonium)bis(maleonitriledithialato) Cu II , x-ray and electron spin resonance studies of (L)	557
Donor, phosphor in Si, corrected ground state energy of (L)	1774
Dysprosium aluminium garnet, magnetization of	684
Elastic constants, isotropic third-order, of quasi-isotropic materials	829
Elastic constants of inert gas solids at absolute zero, long-range three-body forces, effect of	1505
Elastic constants of inert gas solids, contributions of non-central force to (L)	266
Elastic constants of metallic lithium	1332
Elastic shear constants, first-, second- and third-order of hexagonal metals for arbitrary axial ratio, contributions to	478
Electric field effect on electron paramagnetic resonance spectrum of Cu^{2+} ions in tetrahedral crystal fields	877
Electric fields in crystals, α -quartz refractivity due to	889
Electric fields, strong, steady current in	49

	PAGE
Electric moment, second-order, in crystals, contribution to optical absorption	1176
Electrical conductivity of coloured KCl cadmium-doped crystals	1220
Electrical resistivity of nickel and its alloys	1359
Electro-optic effect, linear, in ammonium chloride, electronic contribution to	286
Electro-optical infra-red effects in diamond (L)	1769
Electron and phonon systems in metal, energy transfer between	1318
Electron correlations in hybrid bands, model for	1263
Electron diffraction, low-energy, from crystal surfaces	1237
Electron gas, crystallization and magnetic ordering in	61
Electron gas, screening around ion cores in	61
Electron gas, statistical model calculations of atoms embedded in	53
Electron-ion pseudopotentials in alkali metals	232
Electron paramagnetic resonance angular spectra, anomalous, of gadolinium in rare earth double-nitrate single crystals	599
Electron paramagnetic resonance line broadening in ruby	913
Electron paramagnetic resonance spectrum of Cr^{3+} ions in single crystals of AlF_3	387
Electron paramagnetic resonance spectrum of Cu^{2+} ions in tetrahedral crystal fields, linear electric field effect on	877
Electron-phonon interaction, magnitude of, superconductivity and (L)	548
Electron spin resonance in CdS	1213
Electron spin resonance of coloured KCl cadmium-doped crystals	1220
Electron spin resonance of iron in silver chloride	1205
Electron spin resonance, saturation and spectral diffusion in	919
Electron states, localized, in liquid chains, non-exponential range of (L)	549
Electron tunnelling, density of states and phonon spectrum of superconducting thallium by	732
Electronic band structure, muffin-tin approximation in calculation of	1288
Electronic contribution to linear electro-optic effect in ammonium chloride	286
Electronic phase transitions in lower oxides of vanadium	189
Electronic specific heats of copper-based alloys	795
Electronic structure of noble metals	1296, 1307
Electronic structure of transition metal alloys	253
Electronic transport in liquid and solid sulphur	1347
Electrons, donor, optical absorption due to, in semiconductors with spheroidal conduction band (L)	541
Electrons, localization in ordered and disordered systems, study by percolation theory	1532
Electrons, low-energy electrons by crystals	82
Electrons, low-energy, reflected from Al and Cu, characteristic energy losses of	979
Electrons, secondary, from metals, multiple emission distribution of	1324
Electrostatics of crystals, generalized form of Ewald method for point charges	1534
Emission spectra, <i>see</i> Spectra, emission	
Energy band structure of noble metals	759
Energy, cohesive, in simple metals, structural expansion of	1620
Energy, vibrational zero-point, of cubic crystals	839
Erbium doping in yttrium iron garnet, influence on magnetic domain wall switching	1046
Erbium, triply ionized, in yttrium gallium garnet, optical absorption intensities and quantum counter action of	157
Exciton-photon coupling and retarded interactions in molecular crystals	42
Expansion coefficients, low-temperature thermal, of $\text{CoCl}_2 \cdot 6\text{H}_2\text{O}$	364
Ethyl sulphates, rare earth, magnetic contributions to specific heats of	694
F-aggregate bands in KBr crystals, optical and thermal stability, half-widths and oscillator strengths	895
F band in LiF, annealing and re-irradiation behaviour	906
F band in magnesium oxide, temperature dependence of	586
F-centre production in alkali halides, experiments relating to effect of impurities on	323
Ferromagnetic alloys, second-order effects in diffuse elastic neutron scattering	966
Ferromagnetic polarization, distribution in PdFe single crystal	528
Ferromagnetism of ZrZn_2	1604
Fields, magnetic, <i>see</i> Magnetic fields	
Fluid correlation functions, two-dimensional, geometrical sum rule for	1461

	PAGE
Fluids, inert-gas, partial structure factors of binary mixture of	1472
Fluorides of calcium, strontium and barium, Grüneisen parameter low-temperature limit, on Axe's shell model (L)	1138
Fluorine ions, second-nearest in MgF_3 , interactions with	849
Flux vortices in arbitrary configuration, forces on	715
Franz-Keldysh effect, on theory of	378
Gadolinium aluminate, antiferromagnetic order in	169
Gadolinium in rare earth double-nitrate single crystals, anomalous electron paramagnetic resonance angular spectra of	599
Gadolinium metal, spin-wave theory of magnetocrystalline anisotropy in	1279
Gadolinium-yttrium alloys spin-disorder resistivity measurements in (L)	1140
Gallium antimonide, light and heavy hole masses in	533
Gallium arsenide, light and heavy hole masses in	533
Gallium arsenide, n-type, magnetophonon resistance oscillations in	1711
Gallium metal, crystal structure of	222
Gallium phosphide, energy levels of nitrogen-nitrogen pairs in (L)	1136
Gallium phosphide, epitaxial, intrinsic and extrinsic edge luminescence in	1759
Gallium, structure and phase changes of	1337
Galvanomagnetic coefficients, hot-electron, of polar semiconductors	1398
Gamma rays, nuclear resonant diffraction of, by perfect crystals	973
Gaseous adsorption, influence on metal-BaTiO ₃ contact	1370
Geometrical sum rule for two-dimensional fluid correlation functions	1461
Germania, vibrational spectra of	299
Germanium, p-type, transport properties study by magnetoplasma waves	1447
Goethite ($\alpha\text{-FeOOH}$), magnetic structure and hyperfine field of	179
Ground state energy, corrected, of P donor in Si (L)	1774
Ground state of ferrous ion in alumina and spin-lattice relaxation	1554
Group II-VI compounds, vanadium-doped, spin resonance of	818
Grüneisen parameter in fluorides of calcium, strontium and barium, low-temperature limit of, on Axe's shell model (L)	1138
Haematite ($\alpha\text{-Fe}_2\text{O}_3$), antiferromagnetic resonance measurements in	169
Hafnium isotopes, Mössbauer effect measurements in	1662
Hall coefficient, ordinary, of iron at low temperatures, theory of	1052
Hall mobility coefficients, hot-electron, of polar semiconductors	1398
Heat capacities, low-temperature, containing two or more contributions, analyses of, applica- tion to rare earth metals	370
Heat capacities of non-cubic solids	1
Heisenberg antiferromagnet, spin-wave theory of impurity states in, impurity-host exchange coupling	102, 118
Helium 3, liquid, acoustic impedance of	555
Heisenberg model with/dipole-dipole forces, free energy dependence on sample shape	1584
Heusler alloy Co_2MnSn , Mössbauer effect in	473
Hybrid bands, model for electron correlations in	1263
Hydrogen bromide in deuterium bromide, nuclear magnetic spin relaxation in solid solutions of	422
Hydrogen chloride in deuterium chloride, nuclear magnetic spin relaxation in solid solutions of	445
Hyperfine interactions, transferred through unpaired spin on intervening ions, V^{2+} and Mn^{2+} in KMgF_3	849
Impurities and defects in solids, strict bounds for out-of-band frequencies due to	22
Impurities, experiments relating to effect on F-centre production in alkali halides	323
Impurities in Ising lattices	575
Impurities, interstitial, in alkali halides, relaxation phenomena due to	644
Impurities, substitutional, in nickel, magnetic disturbances associated with	458
Impurity states in Heisenberg antiferromagnet, spin-wave theory of, impurity-host exchange coupling	102, 118

	PAGE
Impurity states, magnetic-field dependent, in n-type In Sb	1118
Indium antimonide, n-type, magnetic field dependent impurity states in	1118
Induced-moment systems, two kinds of	1246
Inert-gas fluids, partial structure factors of binary mixture of	1472
Inert-gas solids, contributions of non-central force to elastic constants of (L)	266
Inert-gas solids, effect of long-range three-body forces on zero-point energy of	35
Inert-gas solids, elastic constants at absolute zero, long-range three body forces, effect of	1505
Infra-red electro-optical effects in diamond (L)	1769
Infra-red luminescence of zinc and cadmium sulphide phosphors, role of cation vacancies	1746
Interactions, exchange, and spin-wave spectrum of terbium	125
Interactions, retarded, and exciton-photon coupling in molecular crystals	42
Intermetallic compounds, Ln Fe ₂ , Mössbauer studies of hyperfine interactions in	1376
Ion cores in electron gas, screening around	56
Ion-electron pseudopotentials in alkali metals	232
Ionic radii in alkaline earth chalcogenides	582
Ions, fluorine second-nearest, in KMgF ₃ , interactions with	849
Ions in cubic crystals, Zeeman spectra of, intensities for $\Gamma_6 \rightarrow \Gamma_8$ and $\Gamma_7 \rightarrow \Gamma_8$ transitions (L)	1455
Ions, octahedrally co-ordinated, E-type orbitals	859
Iridium complexes, magnetic properties of	1024
Iridium salts, spin-lattice relaxation in	990, 1011
Iron, electronic band structures, approximate calculation of	1637
Iron in silver chloride, electron spin resonance of	1205
Iron, ordinary Hall coefficient at low temperatures, theory of	1052
Iron-palladium dilute alloys, spin-wave stiffness of	1699
Iron-rare earth cubic Laves intermetallic compounds, Mössbauer studies of	1376
Iron-rich alloys with various transition element, magnetization values for	244
Iron-rich solid solution alloys, with non-transition elements, saturation magnetizations of	1103
Iron, spin-wave renormalization effects in	950
Iron 3+ ions in methylamine alum, paramagnetic resonance of	1228
Iron 57 Mössbauer sources, preparation, and causes of line broadening in	1388
Irradiation and annealing behaviour, F band in LiF	906
Ising lattices, impurities and defects in	575
Ising model above and below critical temperature, critical behaviour of	392
Ising model, three-dimensional, specific heat below T_c	1038
Ising model, three-dimensional, specific heat critical behaviour below T_c	1588
Isotope effects in crystal-field parameters (L)	1768
K-absorption edge, x-ray, of Cu, shifts due to chemical effects	1658
L ₂₃ emission spectra, experimental, in aluminium, determination of effective potentials from	776
Lattice vibrations, optical, in finite ionic crystals	614, 630, 1515
Lattice, ZnO, with Cu ²⁺ ions, crystal field changes due to ligand ion displacements	872
Lattices, cubic, zero-point vibrational energy	839
Lattices, Ising, impurities and defects in	575
Lattices, isotopically disordered two- and three-dimensional, generalized special frequencies in spectra of	304
Lattices, non-isotopically disordered, applications of evaporation method to	312
Laves iron-rare earth intermetallic compounds, Mössbauer studies of	1376
Laves-phase rare-earth-transition metal compounds, itinerant electron moment in	1112
Lead, high-temperature thermodynamic data, measurement and analysis of	1481, 1489
Lead, liquid, co-operative modes of motion in	507
Lead, liquid, structure factors of	1075
Lead, liquid, temperature dependence of co-operative modes of motion	519
Line broadening, electron paramagnetic resonance, in ruby	913
Line broadening in ⁵⁷ Fe sources, causes of	1388
Line shapes, nuclear magnetic resonance, of methyl groups undergoing tunnelling rotation	932
Line spectrum energy levels of nitrogen-nitrogen pairs in GaP (L)	1136
Liquid and solid sulphur, electronic transport in	1347
Liquid chains, non-exponential range of localized electron states in (L)	549
Liquid metal binary mixtures, critical opalescence in, temperature dependence	1088

Liquid metals, ZnTl, Pb, Sn and Bi, structure factors of	1075
Liquid sodium-alkali alloys, nuclear magnetic resonance in	1097
Lithium fluoride F band, annealing and re-irradiation behaviour	906
Lithium, metallic, elastic constants of	1332
Luminescence, infra-red, of zinc and cadmium sulphide phosphors and role of cation vacancies	1746
Luminescence, intrinsic and extrinsic edge in epitaxial GaP	1759
Magnesium oxide, acoustic paramagnetic resonance spectrum of chromous ions in	594
Magnesium oxide, irradiated, study of very small defect clusters using long-wavelength neutron scattering measurements	333
Magnesium oxide, R lines, isotope shifts in (L)	1768
Magnesium oxide, temperature dependence of F band in	586
Magnesium oxide, trigonal colour centres, spin-orbit coupling and stress spectra	1194
Magnetic breakdown in metals, influence on magnetoresistance	1608
Magnetic contributions to specific heats of rare earth ethyl sulphates	694
Magnetic disturbances associated with substitutional impurities in nickel	458
Magnetic domain wall switching of yttrium iron garnet, influence of erbium doping	1046
Magnetic field dependent impurity states in n-type InSb	1118
Magnetic fields, hyperfine, at ^{119}Sn in erbium	1258
Magnetic induced-moment system, two kinds of	1246
Magnetic ordering and crystallization in electron gas	61
Magnetic moment in cubic Laves-phase rare-earth-transition metal compounds	1112
Magnetic moments in dilute transition metal alloys	687
Magnetic properties of CeAs and CeSb deduced from neutron scattering data	679
Magnetic properties of $(\text{IrX}_6)^{2-}$ complexes	1024
Magnetic properties of superconducting alloy films	699
Magnetic structure and hyperfine field of goethite ($\alpha\text{-FeOOH}$)	179
Magnetic systems, mixed, neutron elastic diffuse scattering from	88
Magnetization and magnetic specific heat of terbium	1596
Magnetization, dysprosium aluminium garnet	684
Magnetization, ground-state sublattice in antiferromagnet	408
Magnetization values for iron-rich alloys with various transition elements	244
Magnetizations of iron-rich solid alloys with non-transition elements	1103
Magnetocrystalline anisotropy in gadolinium metal, spin-wave theory of	1279
Magnetophonon effect in III-V semiconducting compounds	1711
Magnetophonon resistance oscillations in CdTe, evidence for enhancement of polaron effect in	821
Magnetoresistance coefficients of polar semiconductors	1398
Magnetoresistance of metals, influence of breakdown and spin-orbit coupling on	1608
Magnon sideband shapes in antiferromagnetic crystals, Green function theory of	1568
Magnon (two-) scattering of neutrons involving orbital transitions in antiferromagnets	673
Manganese-nickel alloys, γ -phase, antiferromagnetism in	1683
Manganese-palladium alloys, γ -phase, antiferromagnetism in	1683
Metal-BaTiO ₃ contact, gaseous adsorption influence	1370
Metal, copper, band structure of, cellular eigenvale calculations	1633
Metal, gadolinium, spin-wave theory of magnetocrystalline anisotropy in	1279
Metal gallium, crystal structure of	222
Metal, liquid, binary mixtures, critical opalescence in, temperature dependence	1088
Metal, transition, theory of band structure of	492
Metallic lithium, elastic constants of	1332
Metals, alkali, electron-ion pseudopotentials	232
Metals, divalent simple, structure of	210
Metals, energy transfer between electron and phonon systems in	1318
Metals, heavy rare earth, indirect nuclear spin relaxation in	748
Metals, hexagonal, contributions to first-, second- and third-order elastic shear constants for arbitrary axial ratio	478
Metals, liquid, application of neutron diffraction techniques to determination of structure factor for	784
Metals, liquid Zn, Tl, Pb, Sn and Bi, structure factors of	1075
Metals, magnetoresistance of, influence of breakdown and spin-orbit coupling on	1608

	PAGE
Metals, monovalent, interionic potentials in	486
Metals, noble, electronic structure of	1296, 1307
Metals, noble, energy band structure of	759
Metals, rare earth, application of analyses of low-temperature heat capacities containing two or more contributions	370
Metals, secondary electrons, multiple emission distribution of	1324
Metals, simple, structural expansion of cohesive energy of	1620
Metals, spin susceptibility, generalized, in correlated narrow-energy-band model	1650
Metals, transition and noble, many-channel scattering by localized potential, displaced charge	1312
Metals, transition, structure of	763
Metals with incomplete inner shells, superconductivity in (L)	544
Methyl alcohol and cyclohexane critical mixture, acoustic behaviour of	1476
Methyl groups undergoing tunnelling rotation, nuclear magnetic resonance line shapes	932
Mixture, critical, of methyl alcohol and cyclohexane, acoustic behaviour of	1476
Mixtures, binary liquid metal, critical opalescence in, temperature dependence	1088
Mixtures, binary, of inert-gas fluids, partial structure factors of	1472
Molecular crystals, exciton-photon coupling and retarded interactions in	42
Molecular orbital theory for Cu^{2+} in tetrahedral co-ordination	810
Moments, magnetic, in dilute transition metal alloys	687
Mössbauer and x-ray diffraction study on cation distribution in FeAl_2O_4	469
Mössbauer effect in Heusler alloy Co_2MnSn	473
Mössbauer effect measurements in Hf isotopes	1662
Mössbauer ^{57}Fe sources, preparation, and causes of line broadening	1388
Mössbauer spectra for dilute SnEr alloy	1258
Mössbauer studies of cubic Laves iron-rare earth intermetallic compounds	1376
Muffin-tin approximation in calculation of electronic band structure	1288
Neutron diffraction techniques, application to determination of structure factor for liquid metals	784
Neutron elastic diffuse scattering from mixed magnetic systems	88
Neutron scattering, cold inelastic, use in observation of temperature dependence of co-operative modes of motion in liquid lead	519
Neutron scattering data for spin waves in terbium, analysis of	125
Neutron scattering data, magnetic properties of CeAs and CeSb deduced from	679
Neutron scattering, diffuse-elastic, from ferromagnetic alloys, second-order effects in	966
Neutron scattering, elastic magnetic diffuse, from single crystal of PdFe	528
Neutron scattering from paramagnets	1563
Neutron scattering measurements in paramagnetic RbMnF_3 , for spin correlation determination	940
Neutron scattering measurements, long-wavelength, use in study of very small defect clusters in irradiated magnesium oxide	333
Neutron scattering, slow, use in observation of co-operative modes of motion in liquid lead	507
Neutrons, two-magnon scattering of, involving orbital transitions in antiferromagnets	673
Nickel and its alloys, electrical resistivity of	1359
Nickel, magnetic disturbances associated with substitutional impurities in	458
Nickel oxide, semiconducting, optical absorption of small polarons in infra-red	1418
Nickel-manganese alloys, γ -phase antiferromagnetism in	1683
Nickel, spin-wave renormalization effects in	950
Nitrogen-nitrogen pairs in GaP, energy levels of (L)	1136
Noble metals, electronic structure of	1296, 1307
Noble metals, many-channel scattering by localized potential, displaced charge	1312
Nuclear magnetic resonance in isometric trimethylbenzenes	415
Nuclear magnetic resonance in liquid sodium-alkali alloys	1097
Nuclear magnetic resonance of dilute Al-Zn alloys, quadrupole structure in	1690
Nuclear magnetic resonance narrowing due to coherent zero-point motion (L)	265
Nuclear magnetic resonance spectra of methyl groups undergoing tunnelling rotation	932
Nuclear magnetic spin relaxation in solid solutions of hydrogen bromide in deuterium bromide	422
Nuclear magnetic spin relaxation in solid solutions of hydrogen chloride in deuterium chloride	445
Nuclear resonant diffraction of gamma rays, by perfect crystals	973
Nuclear spin relaxation, indirect, in ferromagnetic heavy rare earth metals	748

	PAGE
Opalescence, critical, in binary liquid metal mixtures, temperature dependence	1088
Optical absorption due to donor electrons in semiconductors with spheroidal conduction band (L)	541
Optical absorption in crystals, second-order electric moment contribution to	1176
Optical absorption in presence of static electric field	378
Optical absorption intensities and quantum counter action of Er^{3+} in yttrium gallium garnet	157
Optical absorption of coloured KCl cadmium-doped crystals	1220
Optical absorption of small polarons in semiconducting NiO and CoO	1418
Optical lattice vibrations in finite ionic crystals	614, 630, 1515
Optical phonons, long-wave, in finite ionic crystals, theory of	614
Orbitals, E-type in octahedrally co-ordinated ions	859
Ortho-aluminates, three antiferromagnetic rare-earth, some thermal properties of (L)	539
Palladium-iron dilute alloys, spin-wave stiffness of	1699
Palladium-iron single crystal, distribution of ferromagnetic polarization in	528
Palladium-manganese alloys, γ -phase, antiferromagnetism in	1683
Paramagnetic RbMnF_3 , spin correlations in	940
Paramagnetic resonance of Fe^{3+} in methylamine alum	1228
Paramagnetic resonance spectrum, acoustic, of chromous ions in magnesium oxide	594
Paramagnets, neutron scattering from	1563
Phase transitions of alkali halides, Born treatment, using new van der Waals coefficients (L)	1134
Phonon and electron systems in metal, energy transfer between	1318
Phosphor donor in Si, corrected ground state energy of (L)	1774
Phosphors, zinc and cadmium sulphide, infra-red luminescence and role of cation vacancies	1746
Polycrystalline solid, isotropic third-order elastic constants of	829
Phonon absorption in rare-gas crystals	1184
Phonon-electron interaction, magnitude of, superconductivity and (L)	548
Photon-exciton coupling and retarded interactions in molecular crystals	42
Phonon scattering mechanisms and polar semiconductor hot-electron galvanomagnetic coefficients	1398
Phonon spectrum, <i>see</i> Spectrum, phonon	
Phonons in sodium fluoride, x-ray scattering by	648
Phonons, long-wave optical, in finite ionic crystals, theory of	614
Photoconductivity, oscillatory, from shallow donors in n-type CdTe	1412
Plasma edge reflectivity measurements, in semiconductor studies	1435
Polaritons in finite ionic crystals, theory of	630
Polaron effect in magnetophonon resistance oscillation in CdTe, evidence for enhancement of	821
Polarons in semiconducting NiO and CoO, optical absorption of	1418
Potassium bromide additively coloured crystals, F-aggregate bands, optical and thermal stability, half-widths and oscillator strengths	895
Potassium chloride coloured Cd-doped crystals, optical absorption, electron spin resonance and electrical conductivity	1220
Potassium MgF_3 , transferred hyperfine interactions through unpaired spin on fluorine-ion neighbours to V^{2+} and Mn^{2+}	849
Potentials, effective, determination from experimental L_{23} emission spectra in aluminium	776
Potentials, interionic, in monovalent metals	486
Pseudo-potentials, analytic properties of	1065
Quantum counter action and optical absorption intensities of Er^{3+} in yttrium gallium garnet	157
α -quartz refractivity due to crystal electric field	889
Rare earth cubic Laves phase compounds, itinerant electron moment in	1112
Rare earth double-nitrate single crystals, anomalous electron paramagnetic resonance angular spectra of gadolinium in	599
Rare earth ethyl sulphates, magnetic contributions to specific heats of	694
Rare earth-iron cubic Laves intermetallic compounds, Mössbauer studies of	1376
Rare earth metals, application of analyses of low-temperature heat capacities containing two or more contributions	370

	PAGE
Rare earth metals, heavy indirect nuclear spin relaxation in	748
Rare earth ortho-aluminates, three antiferromagnetic, some thermal properties of (L)	539
Rare-gas crystals, defect-induced one-phonon absorption in	1184
Reflected low-energy electrons from Al and Cu, characteristic energy losses of	979
Reflectivity, measurements in GaAs and GaSb	533
Reflectivity measurements, plasma-edge, in semiconductor studies	1435
Reflectivity spectrum, fundamental, of solid solutions $\text{Zn}_x\text{Hg}_{1-x}\text{Te}$	804
Refractivity of α -quartz due to crystal electric field	889
Relaxation, nuclear magnetic spin, <i>see</i> Nuclear magnetic spin relaxation	
Relaxation phenomena due to interstitial impurities in alkali halides	644
Relaxation, spin-lattice, <i>see</i> Spin-lattice relaxation	
Relaxation times, normal process, from thermal conductivity data	11
Resistivity change in thin copper wire due to pulsed electric field	1318
Resistivity, electrical, <i>see also</i> Electrical resistivity	
Resistivity, spin-disorder measurements in Gd-Y alloys (L)	1140
Resonance, antiferromagnetic, <i>see</i> Antiferromagnetic resonance	
Resonance, electron paramagnetic, <i>see</i> Electron paramagnetic resonance	
Resonance, electron spin, <i>see</i> Electron spin resonance	
Resonance lines, inhomogeneously broadened, second-order effects on shapes of	565
Resonance, paramagnetic, <i>see</i> Paramagnetic resonance	
Resonance, nuclear magnetic, <i>see</i> Nuclear magnetic resonance	
Rubidium MnF_3 , paramagnetic, spin correlations	940
Ruby, electron paramagnetic resonance line broadening in	913
Ruby, ferrous ion ground state and spin-lattice relaxation of	1554
Ruby, R lines, isotope shifts in (L)	1768
Scattering, cold inelastic neutron, use in observation of temperature dependence of co-operative modes of motion in liquid lead	519
Scattering data, inelastic, for spin waves in terbium, analysis of	125
Scattering, elastic magnetic diffuse neutron, from single crystal of PdFe	528
Scattering, many-channel, in metals, by localized potential, displaced charge	1312
Scattering measurements, long-wavelength neutron, use in study of very small defect clusters in irradiated magnesium oxide	333
Scattering, neutron diffuse elastic, from ferromagnetic alloys, second-order effects in	966
Scattering, neutron elastic diffuse, from mixed magnetic systems	88
Scattering, neutron, measurements in paramagnetic RbMnF_3 , for spin correlation determination	940
Scattering, slow neutron, use in observation of co-operative modes of motion in liquid lead	507
Scattering, two-magnon, of neutrons involving orbital transitions in antiferromagnets	673
Scattering, x-ray, by phonons in sodium fluoride	648
Screening around ion cores in electron gas	56
Second harmonic generation in current density, in inhomogeneous semiconductors, at low temperatures	1128
Secondary electrons, from metals, multiple emission distribution of	1324
Semiconducting compounds, III-V, magnetophonon effect in	1711
Semiconducting natural diamond, acceptor centre, nature of (L)	1773
Semiconductors, binary, atomic displacement energies for	1734
Semiconductors, inhomogeneous, nonlinear second harmonic generation in, at low temperatures	1128
Semiconducting NiO and CoO, optical absorption of small polarons in	1418
Semiconductors, polar, hot-electron galvanomagnetic coefficients of	1398
Semiconductors, p-type, magnetoplasma wave propagation, application to transport properties study	1447
Semiconductors, study by plasma edge reflection measurements	1435
Semiconductors with spheroidal conduction band, optical absorption due to donor electrons in (L)	541
Silica, vitreous, vibrational spectra of	299
Silicon with P donor, corrected ground state energy of (L)	1774
Silver chloride, iron-doped, electron spin resonance of	1205
Sodium fluoride, low-temperature specific heats and thermodynamic properties of	1162
Sodium fluoride, x-ray scattering by phonons in	648

	PAGE
Sodium, liquid, in alkali alloys, nuclear magnetic resonance in	1097
Solid solutions $\text{Zn}_x\text{Hg}_{1-x}\text{Te}$, fundamental reflectivity spectrum of	804
Solids, thermodynamic properties, high-temperature, anharmonic effects in	1481, 1489
Specific heat, magnetic, of terbium	1596
Specific heat of three-dimensional Ising model	1038
Specific heat of three-dimensional Ising model, critical behaviour below T_c	1588
Specific heats, electronic, of copper-based alloys	795
Specific heats, low-temperature, of NaF and CsBr	1162
Specific heats of rare earth ethyl sulphates, magnetic contributions to	694
Spectra, aluminium x-ray band, interpretation of	767, 776
Spectra, anomalous electron paramagnetic resonance angular, of gadolinium in rare earth double-nitrate single crystals	599
Spectra, experimental L_{23} emission in aluminium, determination of effective potentials from	776
Spectra, nuclear magnetic resonance, of methyl groups undergoing tunnelling rotation	932
Spectra, stress, of trigonal colour centres in MgO	1194
Spectra, ultra-violet and visible emission, and absorption of $\text{MgAl}_2\text{O}_4:\text{Cr}$	608
Spectra, x-ray absorption, model for extended fine structure in	1171
Spectra, x-ray K absorption, of arsenic, chemical effects in	208
Spectra, Zeeman, <i>see</i> Zeeman spectra	
Spectral diffusion and saturation in electron spin resonance	919
Spectral gaps in vibrational systems, applications of evaporation method to non-isotopically disordered lattices	312
Spectral gaps in vibrational systems, generalized special frequencies in spectra of isotopically disordered two- and three-dimensional lattices	304
Spectrum, acoustic paramagnetic resonance, of chromous ions in magnesium oxide	594
Spectrum, electron paramagnetic resonance, of Cu^{2+} ions in tetrahedral crystal fields, electric field effect on	877
Spectrum, fundamental reflectivity, of solid solutions $\text{Zn}_x\text{Hg}_{1-x}\text{Te}$	804
Spectrum, phonon, and density of states of superconducting thallium by electron tunnelling	732
Spectrum, spin-wave, <i>see</i> Spin-wave spectrum	
Spectrum, vibrational, <i>see</i> vibrational spectrum	
Spin correlations in paramagnetic RbMnF_3	940
Spin-density waves, stability and thermodynamic behaviour of	1145, 1155
Spin-disorder resistivity measurements in Gd-Y alloys (L)	1140
Spin-lattice relaxation in iridium salts	990, 1011
Spin-lattice relaxation, nuclear, in solid solutions of hydrogen bromide in deuterium bromide	422
Spin-lattice relaxation, nuclear, in solid solutions of hydrogen chloride in deuterium chloride	445
Spin-lattice relaxation of ferrous ion ground state in ruby	1554
Spin-lattice relaxation of T:Al acetylacetonate	1543
Spin-lattice relaxation time measurements of Tb^{3+} on CaWO_4	146
Spin-lattice relaxation times in isomeric trimethylbenzenes	415
Spin-orbit coupling in metals, influence on magnetoresistance	1608
Spin-orbit coupling of trigonal colour centres in MgO	1194
Spin polarization in dilute magnetic alloys	1706
Spin susceptibility, generalized, in correlated narrow-energy-band model	1650
Spin, unpaired on intervening ions, V^{2+} and Mn^{2+} in KMgF_3 , transferred hyperfine interactions due to	849
Spin resonance of vanadium-doped II-VI compounds	818
Spin-wave renormalization effects in iron and nickel	950
Spin-wave spectrum and exchange interactions of terbium	125
Spin-wave spectrum of terbium, temperature-dependent crystal field effects in	132
Spin-wave stiffness of dilute Fe-Pd alloys	1699
Spin-wave theory of impurity states in Heisenberg antiferromagnet, impurity-host exchange coupling	102, 118
Spin-wave theory of magnetocrystalline anisotropy in gadolinium metal	1279
Spinel structure, effect upon x-ray diffraction line profiles of substitutional disorder in	658
Stability, optical and thermal, of KBr crystal F-aggregate bands	895
Statistical model calculations of atoms embedded in electron gas	53
Stress spectra of trigonal colour centres in MgO	1194
Strontium fluoride, Grüneisen parameter low-temperature limit, on Axe's shell model (L)	1138
Sulphur, liquid and solid, electronic transport in	1347

	PAGE
Superconducting alloy films, magnetic properties of	699
Superconducting surface nucleation fields, influence of planar defects on	293
Superconducting thallium, density of states and phonon spectrum by electron tunnelling	732
Superconductivity and magnitude of electron-phonon interaction (L)	548
Superconductivity in metals with incomplete inner shells (L)	544
Superconductor, thermal conductivity of intermediate state of	744
Susceptibility, boundary, and boundary tension, critical behaviour of (L)	268
Tellurium, liquid, structure factors of	1075
Tension, boundary, and boundary susceptibility, critical behaviour of (L)	268
Tetrahedron, trigonally-distorted, collective coordinates for	872
Terbium, temperature-dependent crystal field effects in spin-wave spectrum of	132
Terbium, magnetization and magnetic specific heat of	1596
Terbium, triply ionized, in CaWO_4 , spin-lattice relaxation measurements of	146
Thallium, superconducting, density of states and phonon spectrum by electron tunnelling	732
Thermal conductivity data, normal process relaxation times from	11
Thermal conductivity of intermediate state of superconductor	744
Thermal conductivity of structurally disordered solids	347
Thermal expansion coefficients, low-temperature, of $\text{CoCl}_2 \cdot 6\text{H}_2\text{O}$	364
Thermal properties, of three antiferromagnetic rare-earth ortho-aluminates (L)	539
Thermodynamic behaviour and stability of spin-density waves	1145, 1155
Thermodynamic properties, high-temperature, of solids, anharmonic effects in	1481, 1489
Thermodynamic properties of NaF and CsBr	1162
Thulium $2+$ ion in calcium fluoride, covalency in	1670
Tin, liquid, structure factors of	1075
Tin 119 nuclei in erbium, hyperfine magnetic fields at	1258
Titanium and aluminium acetylacetonate crystals, spin-lattice relaxation of	1543
Transition elements, various, magnetization values for iron-rich alloys with	244
Transition metal alloys, dilute, magnetic moments in	687
Transition metal alloys, electronic structure of	253
Transition metal band structures, theory of	492
Transition metals, many-channel scattering by localized potential, displaced charge	1312
Transition metals, structure of	763
Transport, electronic, in liquid and solid sulphur	1347
Transport properties of p-type germanium, study by magnetoplasma waves	1447
Trimethylbenzenes, isomeric, nuclear magnetic resonance in	415
Ultra-violet and visible emission and absorption spectra of $\text{MgAl}_2\text{O}_4:\text{Cr}$ spectra, ultra-violet	608
Vanadium-doped II-VI compounds, spin resonance	818
Vanadium, lower oxides of, electronic phase transitions in	189
Vibrational energy, zero-point, of cubic crystals	839
Vibrational spectra of vitreous silica, germania and beryllium fluoride	299
Vibrational systems, spectral gaps in, applications of evaporation method to non-isotopically disordered lattices	312
Vibrational systems, spectral gaps in, generalized frequencies in spectra of isotopically disordered two- and three-dimensional lattices	304
Vibrations, optical lattice, in finite ionic crystals	614, 630, 1515
Vortices, flux, in arbitrary configuration, forces on	715
X-ray absorption spectra, model for extended fine structure in	1171
X-ray and electron spin resonance studies of di(tetramethylammonium)bis(maleonitriledithialato)Cu II (L)	551
X-ray band spectra, aluminium, interpretation of	767, 776
X-ray diffraction and Mössbauer study on cation distribution in FeAl_2O_4	469
X-ray diffraction line profiles, effect of substitutional disorder in spinel structure upon	658
X-ray diffraction study of disorder in MgFe_2O_4 and $\text{Mg}(\text{Cr}, \text{Al})\text{O}_4$	663
X-ray K-absorption edge of Cu, shifts due to chemical effects	1658
X-ray K absorption spectra of arsenic, chemical effects in	208
X-ray scattering by phonons in sodium fluoride	648

	PAGE
Ytterbium 3+ ion in calcium fluoride, covalency in	1670
Yttrium gallium garnet, optical absorption intensities and quantum counter action of Er^{3+} in	157
Yttrium iron garnet, domain wall switching of, influence of erbium doping	1046
Zeeman spectra of ions in cubic crystals, intensities for $\Gamma_6 \rightarrow \Gamma_8$ and $\Gamma_7 \rightarrow \Gamma_8$ transitions (L)	1455
Zinc-aluminium dilute alloys, nuclear magnetic resonance, quadrupole structure in	1690
Zinc HgTe, solid solutions, fundamental reflectivity spectrum of	804
Zinc, liquid, structure factors of	1075
Zinc sulphide phosphors, infra-red luminescence and role of cation vacancies	1746
Zirconium-zinc compound, high-purity, ferromagnetism of	1604
